Graphic Designer

I develop and design artwork with the use of Assistive Technology and the assistance of formal & natural supports. My unique abstract artwork designs are printed on a variety of gift accessories such as greeting cards, bags, tiles, water bottles and other. I also design and sell custom orders for special occasions, such as the ostrich eggs that I designed for the Broward County Award ceremony Eddie's Greene, County Action Partnership, Inc .

Consultant/Motivational Speaker

I lecture on the principles of self-determination, transition from school to work, Micro-Enterprise development, and other topics, using a power point presentation, support assistance & Assistive Technology. My presentations can be of interest to a wide audience consisting of college and university students, government officials, healthcare & other professionals in a variety of fields including people with disabilities, their family members and support staff. I have presented to local, state, national and international audiences. My presentations describe how with natural and formal supports and services, and the use of Assistive Technology, people with disabilities are able to attend neighborhood schools, have full participation in their community, employment and develop Small Businesses.
